Redefining How Warfighters and Workers Access
Information Using a Zero Trust Approach

Company Profile

After three decades as an industry pioneer, we've learned a few lessons. Like what it really takes to bridge the gap between employee productivity and innovative thinking. And how a new generation of technologies can help people quiet the noise and focus on the work that matters most. That's why we're committed to delivering intelligent, unified workspaces that allow individuals to take control of their workdays—and empower organizations to achieve more.

Founded in 1989, Citrix (NASDAQ: CTXS) aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. We help customers reimagine the future of work by providing the most comprehensive secure digital workspace that unifies the apps, data and services people need to be productive, and simplifies IT's ability to adopt and manage complex cloud environments. With 2018 annual revenue of \$2.97 billion, Citrix solutions are in use by more than 400,000 organizations including 99 percent of the Fortune 100 and 98 percent of the Fortune 500.

Powering Digital Transformation

At Citrix, we focus on a single driving principle: making the world's apps and data secure and easy to access. Anywhere. At any time. And on any device or network.

We believe that technology should be a great liberator. Freeing organizations to push the limits of productivity and innovation. Empowering people to work anywhere and at any time. And giving IT the peace of mind that critical systems will always be accessible and secure.

That's why, at Citrix, our mission is to power a world where people, organizations, and things are securely connected and accessible. A place where all business is digital business. A world where our customers are empowered to make the extraordinary possible. We will accomplish this by building the world's best integrated technology services for secure delivery of apps and data—anytime, anywhere.

Department of Defense IT Solutions

At Citrix, we help Department of Defense government agencies do more with less by connecting warfighters and workers to the apps and data they need to enhance experiences and simplify outcomes. Ensure reliable access for Department of Defense warfighters and workers while reducing costs and ensuring data security.

Reduce cost and increase productivity

Citrix helps departments securely and efficiently support mobile government workforce while cutting operational costs and enhancing user experience. From provisioning desktops and applications in a matter of minutes, to reducing total operational costs by as much as 40 percent, Citrix solutions deliver significant cost and productivity benefits for government agencies.

Enable a mobile workforce

Deliver seamless mobile access to desktops to improve efficiency and productivity. Real-time network and performance-optimization technologies from us provide a fast, reliable and quality experience regardless of location, device and network connection.

Zero trust delivery mission-critical apps and data

By leveraging zero trust, we transform the government workplace with solutions that protect confidential data and guard agencies against cyber threats. Apps and associated data remain in the data center, where they are accessed through granular, policy-based user authentication. This level of access control, along with auditing and reporting capabilities enable IT to manage compliance, information governance and data protection.

Secure government data in the cloud

We leverage zero trust to enable government agencies to leverage the cost benefits of the cloud while delivering

Customer Use Case

U.S. Department of Defense

Profile: Plays a major role in human health and safety nationwide and internationally.

Challenge: Securely deliver access to internal systems to users anywhere in the world, on government-issued and BYO devices, and over secure and non-secure connections including satellite and LTE.

Results: Citrix Gateway provides flexible access including full VPN, clientless VPN, and Citrix HDX connections. Endpoint Analysis strengthens security by determining each user's location and device type/encryption level, and then connecting them to the appropriate access point based on device requirements and security level.

the robust security, agile flexibility, and enhanced productivity they demand. Government IT departments gain complete visibility and granular control over all end-user data sharing activity.

Simplify adoption of cloud and next-generation networking

Maintain high availability and quality of service for the home office, branch offices, and mobile workers. Regardless of where the applications and data reside – hybrid, on-premises, or multi-cloud environments – you can securely connect users to what they need.
